

COMPLETE
 IN-HOUSE
PRODUCTION

Our high-quality control elements and switching devices offer precise control, high reliability, and ergonomic design for industrial applications.

PRODUCT RANGE

- Joysticks (with Hall sensor technology)
- Joysticks (with contacts and potentiometers)
- Control switches
- Steering column switches
- Control elements
- Ball grips
- Industrial switching devices

Perfect combination:
 C1 console with joystick control

Its versatility enables it to meet the most diverse requirements of agricultural, construction, and industrial machinery. The seamless integration of control elements and displays, combined with a high degree of ergonomics and design flexibility, makes the C1 control panel a future-oriented solution for machine control.

INDUSTRY
JOYSTICKS

YOUR VISION
 OUR TECHNOLOGY
A STRONG CONNECTION

Every industry has its own challenges – we have the right answers. Gessmann develops customized HMI systems (human-machine interfaces) that perfectly connect people and machines.

From conception and development to series production: our experts combine technological precision with durability. To ensure this, every step, from the selection of materials to final assembly, is carefully monitored.

Electrical interfaces

- Current/voltage outputs
- Potential contact
- CAN
- Profinet
- Profisafe
- Profibus
- PWM
- ISOBUS

**THAT'S WHAT MAKES GESSMANN
 JOYSTICKS SPECIAL!**

- **Robust & durable**
- **Precise control**
- **Ergonomic design**
- **Customized solutions**
- **Modular**
- **Safe**

V85

COMPOSITE *DRIVES*

Handles

Can be combined with all Gessmann handles

Flexible use

Thanks to modular design

Friction brake

optional

Long service life

Up to 20 million switching cycles in industrial use

Functional safety

PLd (EN ISO 13849) possible

**COMBINATION OPTIONS
 WITH OUR BALE HANDLES**
